

## EFRAG Sustainability Reporting Board Consultation Survey 1

Fields marked with \* are mandatory.

## EFRAG Sustainability Reporting Board Consultation Survey 1A - 1C, 2

### Consultation survey structure

#### 1. Overall European Sustainability Reporting Standards (ESRS) Exposure Drafts' relevance (Survey 1)

- 1A. Architecture
- 1B. Implementation of Corporate Sustainability Reporting Directive (CSRD) principles
- 1C. Exposure Drafts' content

#### 2. European Sustainability Reporting Standards (ESRS) implementation prioritisation / phasing-in (Survey 1)

#### 3. Adequacy of Disclosure Requirements (Survey 2)

- 3A. Cross cutting standards
- 3B Environmental standards
- 3C Social standards
- 3D Governance standards

---

### Respondent Profile

#### 1. Personal details

\* Organisation name

*50 character(s) maximum*

Federation of European Risk Management Association

\* First name

50 character(s) maximum

Charles

\* Surname

50 character(s) maximum

LOW

\* Email (this information will not be published or made public)

50 character(s) maximum

charles.low@ferma.eu

\* Country of origin

50 character(s) maximum

Belgium

\* 2. Type of respondent

- Academic / research institution
- Audit firm, assurance provider and/or accounting firm
- Business association
- Consumer organization
- ESG reporting initiative
- EU Citizen
- Financial institution (Bank)
- Financial institution (Other financial Market Participant, including pension funds and other asset managers)
- Financial institution (Insurance)
- National Standard Setter
- Non-governmental organisation
- Non-financial corporation with securities listed on EU regulated markets
- Non-financial corporation with securities listed outside EU regulated markets
- Public authority/regulator/supervisor
- Rating agency and analysts
- Trade unions or other workers representatives
- Unlisted non-financial corporations
- Other

\* 3. Size

- Micro (1 to 9 employees)
- Small (10 to 49 employees)
- Medium (50 to 249 employees)
- Large (250 or more employees)
- Not relevant

**\* 4. User/Preparer perspective**

- User
- Preparer
- Both
- Neither

**\* 5. Subject to CSRD**

Separate non-financial corps subject to CSRD from those not subject to CSRD?

- Yes
- No

---

**EFRAG Sustainability Reporting Board Consultation Survey 1A - 1C, 2**

## **1A. Overall ESRS Exposure Drafts' relevance – Architecture**

---

### **Cross-cutting and topical standards**

To facilitate a coherent coverage of the CSRD topics and reporting areas (as per Article 19a paragraph 2 and Article 19b paragraph 2 – see Appendix II) the Exposure Drafts (“EDs”) submitted for public consultation are based upon two categories of standards:

• **Cross-cutting ESRS** which:

1. Establish the general principles to be followed when preparing sustainability reporting in line with the CSRD provisions
2. Mandate Disclosure Requirements (“DRs”) aimed at providing an understanding of (a) strategy and business model, (b) governance and organisation, and (c) materiality assessment, covering all topics.

• **Topical ESRS** which, from a sector-agnostic perspective:

1. Provide topic-specific application guidance in relation to the cross-cutting DRs on strategy and business model, governance, materiality assessment
2. Mandate DRs about the undertaking’s implementation of its sustainability-related objectives (i.e. on its policies, targets, actions and action plans, and allocation of resources)
3. Mandate performance measurement metrics.

A full list of standards and whether they are cross-cutting standards or topical standards can be found in Appendix I.

**Q1: in your opinion, to what extent do the structure and articulation of cross-cutting and topical standards adequately support the coverage of CSRD topics and reporting areas?**

- Not at all

- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

FERMA takes the view that the structure and articulation of standards proposed by EFRAG seems reasonable. It supports coverage of CSRD topics and reporting areas. However, at heart of CSRD reporting is Double Materiality as a concept, which we are positive about overall and generally-speaking, however, we still believe that the standards miss a crucial point about what criteria organisations should use to determine what is material to them.

## Alignment and interoperability with international standards and frameworks

- Article 19b paragraph 3a of the CSRD requires that “When adopting delegated acts pursuant to paragraph 1, the Commission shall take account of the work of global standard-setting initiatives for sustainability reporting, and existing standards and frameworks for natural capital accounting, responsible business conduct, corporate social responsibility, and sustainable development.”
- ESRS EDs were drafted accordingly, with the objective of fostering as much alignment as possible considering the constraints imposed by other provisions included in articles 19a and 19b as per the CSRD proposal. Details of these provisions and how they are covered by the ESRS EDs can be found in Appendix I.
- The structure and organisation of the reporting areas was one aspect of alignment to which particular attention was paid. Thus, the two categories of standards are organised to cover the reporting areas in relation to governance, strategy, assessment/management of impacts, risks and opportunities, and targets/metrics (as considered by the Task Force on Climate-Related Financial Disclosures - TCFD and source of inspiration for the IFRS Sustainability standards). A detailed mapping of the ESRS EDs disclosure requirements with TCFD recommendations and with IFRS Sustainability Exposure Drafts can be found in Appendices 5 and 6.

**Q2: in your opinion, to what extent is the TCFD framework of reporting areas (governance, strategy, risk management and metrics/targets) compatible with the structure of the ESRS?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

FERMA's comments here focus primarily on risk management. We note that there is a structural difference between the TCFD standards and those proposed by EFRAG concerning risk management. While we see the sense in the way EFRAG has proposed these standards, our comment here is that risk management must be seen in terms of the way a 'typical' listed company would approach its corporate governance and therefore its corporate reporting. In best practice, risk management is at the core of organisations so it really runs across the entire execution of organisational strategy. Further, risk management helps the Board of Directors understand the full picture. When information on risk management is published it also helps stakeholders and shareholders get a more complete picture of the organisation. This point is important to bear in mind when developing these standards. Sustainability reporting ultimately goes hand-in-hand with sustainability risk management.

**Q3: in your opinion, to what extent does the approach taken to structure the reporting areas promote interoperability between the ESRS and the IFRS Sustainability Exposure Drafts?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## Consideration given to EU policies and legislation

Article 19b paragraph 3 of the CSRD also requires that “When adopting delegated acts pursuant to paragraph 1, the Commission shall take account of:

1. the information that financial market participants need to comply with their disclosure obligations laid down in Regulation (EU) 2019/2088 and the delegated acts adopted pursuant to that Regulation - **Sustainable Finance Disclosure Requirements**;
2. the criteria set out in the delegated acts adopted pursuant to Regulation (EU) 2020/852 - **Taxonomy Regulation**;
3. the disclosure requirements applicable to benchmarks administrators in the benchmark statement and in the benchmark methodology and the minimum standards for the construction of EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks in accordance with Commission Delegated Regulations (EU) 2020/1816\*8, (EU) 2020/1817 and (EU) 2020/1818 - **Benchmark Regulation**;
4. the disclosures specified in the implementing acts adopted pursuant to Article 434a of Regulation (EU) No 575/2013; **Prudential requirements for Credit Institutions and Investment Firms**;
5. Commission Recommendation 2013/179/EU; **European Commission recommendation on the life cycle environmental performance of products and services**;
6. Directive 2003/87/EC of the European Parliament and of the Council; **GHG allowance Directive**;

7. Regulation (EC) No 1221/2009 of the European Parliament and of the Council; **EMAS regulation**.

**Q4: in your opinion, have these European legislation and initiatives been considered properly?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q5: are there any other European policies and legislation you would suggest should be considered more fully?**

Our only additional comment is that when the proposal for a directive on Corporate Sustainability Due Diligence comes in there will be some linkages to CSRD. As it is a proposal, we are not aware of the extent to which there has been consideration of it in the drafting of these standards, but it should be borne in mind.

## Coverage of sustainability topics

Article 19b paragraph 2 of the CSRD proposal defines the sustainability subject matters (referred to as sustainability topics or subtopics in the ESRS) that the sustainability reporting standards shall address when defining the sustainability information required by article 19a paragraphs 1 and 2 of the CSRD. The ESRS architecture was designed to cover all the detailed subject matters listed in article 19b paragraph 2 for environment-, social- and governance-related matters and to ensure that sustainability information is reported in a carefully articulated manner.

In terms of timing of adoption of European sustainability reporting standards, article 19b paragraph 1 of the CSRD requires the Commission to adopt:

- a first set of sustainability standards covering the information required by article 19a and at least specifying information needed by financial market participants subject to the [SFDR reporting obligations](#)
- a second set of standards covering information that is specific to the sector in which undertakings operate.

Also, article 19c of the CSRD proposal on sustainability reporting standards for SMEs requires the Commission to adopt SME-proportionate standards in a second set.

As a consequence, as per article 19b paragraph 1, are only included in this first set of ESRS Exposure Drafts:

1. the two cross-cutting standards on General principles (ESRS 1) and on General, strategy, governance and materiality assessment (ESRS 2);

2. the eleven topical (sector-agnostic) standards covering environment- (ESRS E1 to E5), social- (ESRS S1 to S4) and governance-related (ESRS G1 and G2) sustainability topics.

A detailed list of ESRS EDs can be found in Appendix I. And the detailed provisions of the CSRD and how they are covered by the ESRS EDs can be found in Appendix II.

**Q6: in your opinion, to what extent does the proposed coverage of set 1 adequately address CSRD sustainability topics?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have.

**Q7: in your opinion, to what extent does the proposed coverage of set 1 (see Appendix I) adequately address SFDR reporting obligations?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

If you think this coverage and its implementation could be improved in any way, please specify how and to what specific SFDR indicator your comment relates

## **Sustainability statements and the links with other parts of corporate reporting**

For clarity and ease of use, standardised sustainability reporting shall be easily identifiable within the management report (MR). To that effect, ESRS 1 – General principles (paragraphs 145 to 152) prescribes how to organise the information required by ESRS. It offers three options (paragraphs 148 and 149) for undertakings to consider when preparing their sustainability reporting:

- a single separately identifiable section of the MR;
- four separately identifiable parts of the MR:

1. General information;
2. Environment;
3. Social;
4. Governance

- one separately identifiable part per ESRS in the MR.

The first option is the preferred option. When applying the other two options the entity shall report a location table to identify where disclosures are presented in the MR.

In order to foster linkage throughout the undertaking's corporate reporting, ESRS 1 also:

- prescribes that the undertaking adopts presentation practices that promote cohesiveness between its sustainability reporting and: (a) the information provided in the other parts of the management report, (b) its financial statements (FS), and (c) other sustainability-related regulated information (paragraphs 131 to 134)
- promotes the incorporation of information by reference to other parts of the corporate reporting in order to avoid redundancy (paragraphs 135 and 136)
- organises connectivity with the financial statements by prescribing how to include monetary amounts or other quantitative data points directly presented in the financial statements (paragraphs 137 to 143).

**Q8: Do you agree with the proposed three options?**

- Yes
- No
- No opinion

**Q9: would you recommend any other option(s)?**

If so, please describe the proposed alternative option(s)

FERMA members suggested making a phase-in approach or using a simplified reporting for the first year (or two) and then moving into a fuller reporting afterwards. For instance, maybe it would make sense to go with "one separate identifiable part per ESRS in the MR" to begin with, then eventually making it into an overall... etc.

**Q10: in your opinion, to what extent do you believe that connectivity between the sustainability reporting and other parts of the management report has been appropriately addressed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q11: in your opinion, to what extent does the incorporation of information in the Sustainability section by reference to other parts of the management report support cohesiveness throughout corporate reporting?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q12: in your opinion, to what extent do the requirements and provisions on how to include monetary amounts and other financial statement-related quantitative data into sustainability reporting support connectivity with the financial statements?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## **1B. Overall ESRS Exposure Drafts relevance – Implementation of CSRD principles**

---

### **Characteristics of information quality**

Article 19a paragraph 2 of the CSRD proposal states that “the sustainability reporting standards referred to in paragraph 1 shall require that the information to be reported is understandable, relevant, representative, verifiable, comparable, and is represented in a faithful manner.”

As a consequence, ESRS 1 - *General principles* defines how such qualities of information shall be met:

- Relevance is defined in paragraphs 26 to 28
- Faithful representation is defined in paragraphs 29 to 32

- Comparability is defined in paragraphs 33 and 34
- Verifiability is defined in paragraphs 35 to 37
- Understandability is defined in paragraphs 38 to 41

**Q13: to what extent do you think that the principle of relevance of sustainability information is adequately defined and prescribed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

With specific reference to the first sentence in paragraph 28 that materiality is an enabling factor of relevance -- we fully agree. Our comment here is aimed at double materiality, and how within this organisations are meant to determine what is material. If there are inconsistencies in what is determined material then there will be inconsistencies in what is determined as relevant information. This is especially concerning between the reporting company and its external auditor, for example, since a discrepancy between what is required from a regulatory perspective and that from perspective of the auditor may vary and that would pose problems to reporting entities.

**Q14: to what extent do you think that the principle of faithful representation of sustainability information is adequately defined and prescribed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

FERMA again here makes a comment that it might be the case that within the materiality concerns there is a missing link to help organisations determine what is material. Furthermore, it may not be possible to always give equal weight to risks and opportunities here ref paragraph 31 since certain risks / opportunities may just not have a balanced nature.

**Q15: to what extent do you think that the principle of comparability of sustainability information is adequately defined and prescribed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

Our reservation here is about comparability with regards to double materiality (see comments on question 18 and 19).

**Q16: to what extent do you think that the principle of verifiability of sustainability information is adequately defined and prescribed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

Here FERMA members have a reservation on how the information companies report may be audited, with the possibility being that the external auditor may conceivably come to a different conclusion about what is material, when compared to the company and what is required.

**Q17: to what extent do you think that the principle of understandability of sustainability information is adequately defined and prescribed?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## Double materiality

Double materiality is a principle that is central to the CSRD proposal and is represented accordingly in the ESRS materiality assessment approach that sustains the definition of mandatory requirements by the cross-cutting and topical standards. This is also true of the materiality assessment any undertaking is expected to perform, per ESRS 2 – *General, strategy, governance and materiality assessment*, to identify its principal sustainability risks, impacts and opportunities. This in turn, defines what sustainability information must be reported by the undertaking.

**Double materiality assessment** supports the determination of whether information on a sustainability matter has to be included in the undertaking's sustainability report. ESRS 1 paragraph 46 states that "a sustainability matter meets the criteria of double materiality if it is material from an impact perspective or from a financial perspective or from both." Further indications as to how to implement double materiality is given by ESRS 2 Disclosure Requirement 2-IRO 1, paragraph 74b(iii) and AG 68. While recognising that both perspectives are intertwined the Exposure Drafts contain provisions about how to implement the two perspectives in their own rights.

**Q18: in your opinion, to what extent does the definition of double materiality (as per ESRS 1 paragraph 46) foster the identification of sustainability information that would meet the needs of all stakeholders?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

FERMA supports the concept and, as far as the definition goes there were no amendments proposed.

However, we are concerned that there is not some criteria that will be used to determine what is material. It could conceivably be the case that two companies in the same sector have completely different criteria for determining what is material to their business. There is a lot of subjectivity here as to defining what is material.

Therefore, we are asking for a clear definition of criteria that helps organisations the "material" selection .

**Q19: to what extent do you think that the proposed implementation of double materiality (as per ESRS 2-IRO 1, paragraph 74b(iii) and AG 61) is practically feasible?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

A similar point as made above in our response to Q18. We are of the view that double materiality implementation is practically feasible for organisations, however, we do have concerns that there may be inconsistencies in how organisations determine what is material.

## Impact materiality

- A definition of impact materiality is given by ESRS 1 paragraph 49: “a sustainability matter is material from an impact perspective if the undertaking is connected to actual or potential significant impacts on people or the environment over the short, medium or long term. This includes impacts directly caused or contributed to by the undertaking and impacts which are otherwise directly linked to the undertaking’s upstream and downstream value chain.”
- A description of how to determine impact materiality and implement impact materiality assessment can be found in ESRS 1 *paragraph 51* and is complemented by ESRS 2 *Disclosure Requirement 2-IRO 1*, paragraph 74b(iii), AG 64 and AG 68.

**Q20: in your opinion, to what extent is the definition of impact materiality (as per ESRS 1 paragraph 49) aligned with that of international standards?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q21: to what extent do you think that the determination and implementation of impact materiality (as proposed by ESRS 1 paragraph 51) is practically feasible?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## Financial materiality

- A definition of financial materiality is given by ESRS 1 paragraph 53: “a matter is material from a financial perspective if it triggers or may trigger significant financial effects on the undertaking, i.e., it generates risks or opportunities that influence or are likely to influence the future cash flows and therefore the enterprise value of the undertaking in the short, medium or long term, but it is not captured or not yet fully captured by financial reporting at the reporting date.”

- A description of how to determine financial materiality and implement financial materiality assessment can be found in ESRS 1 paragraphs 54 to 56 and is complemented by ESRS 2 Disclosure Requirement 2-IRO 1, paragraph 74b(iii), AG 65 and AG 69.

**Q22: in your opinion, to what extent is the definition of financial materiality (as per ESRS 1 paragraph 53) aligned with that of international standards?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q23: to what extent do you think that the determination and implementation of financial materiality (as proposed by ESRS 1 paragraphs 54 to 56) is practically feasible?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## **(Materiality) Rebuttable presumption**

Central to the ESRS is the critical combination of two key elements:

- the mandatory nature of disclosure requirements prescribed by ESRS, and
- the pivotal importance of the assessment by the undertaking of its material impacts, risks and opportunities.

The combination of the two is designed to make sure that the entity will report on its material impacts, risks and opportunities, but on all of them.

The assessment of materiality applies not just to a given sustainability matter covered by a given ESRS (like ESRS E3 on biodiversity for example), but also to each one of the specific disclosure requirements included in that ESRS. However, this excludes the cross-cutting standards and related disclosure requirements, which are always material and must be reported in all cases.

When a sustainability matter is deemed material as a result of its materiality assessment, the undertaking must apply the requirements in ESRS related to these material matters (except for the few optional requirements identified as such in ESRS). Conversely, disclosure requirements in ESRS that relate to matters that are not material for the undertaking are not to be reported.

The (materiality) rebuttable presumption mechanism described in ESRS 1 paragraphs 57 to 62 aims at supporting the implementation and documentation of the materiality assessment of the undertaking at a granular level.

ESRS 1 paragraphs 58 to 62 describe how to implement the rebuttable presumption principles. In particular, “The undertaking shall therefore assess for each ESRS and, when relevant, for a group of disclosure requirements related to a specific aspect covered by an ESRS if the presumption is rebutted for:

1. all of the mandatory disclosures of an entire ESRS or
2. a group of DR related to a specific aspect covered by an ESRS,

Based on reasonable and supportable evidence, in which case it is deemed to be complied with through a statement that:

1. the ESRS or
2. the group of DR is “not material for the undertaking”.

Q24: to what extent do you think that the (materiality) rebuttable presumption and its proposed implementation will support relevant, accurate and efficient documentation of the results of the materiality assessment?

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q25: what would you say are the advantages of the (materiality) rebuttable presumption and its proposed implementation?**

**Q26: what would you say are the disadvantages of the (materiality) rebuttable presumption and its proposed implementation?**

**Q27: how would you suggest it can be improved?**

## Reporting boundary and value chain

ESRS 1 paragraphs 63 to 65 define the reporting boundary of the undertaking and how and when it is expanded when relevant for the identification and assessment of principal impacts, risks and opportunities upstream and downstream its value chain – as the financial and/or impact materiality of a sustainability matter is not constrained to matters that are within the control of the undertaking.

Paragraphs 67 and 68 address the situation when collecting the information about the upstream and downstream value chain may be impracticable, i.e. the undertaking cannot collect the necessary information after making every reasonable effort, and allows approximation based on the use of all reasonable and supportable information, including peer group or sector data.

Due to the dynamics and causal connections between levels within the undertaking's reporting boundary, material information is not constrained to one particular level. Paragraphs 72 to 77 prescribe how the undertaking shall consider the appropriate level of disaggregation of information to ensure it represents the undertaking's principal impacts, risks and opportunities in a relevant and faithful manner.

**Q28: in your opinion, to what extent would approximation of information on the value chain that cannot (practically) be collected contribute to the reporting of understandable, relevant, verifiable, comparable, and faithfully represented sustainability information?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

The concept of value chain is fine as it is set out by EFRAG. In fact, if we understand correctly the reporting must be linked to the risk assessment, which is on the whole a good step for risk management. However, we have identified the possibility that problems may arise regarding how the value chain is interpreted by the company, understood by the competent authorities and then how it is audited by external auditors. If a company must disclose their process for selecting based on a risk-based approach the areas in which they

must report on, there may arise some discrepancies between that which the auditors require and that which are required by the standards, and there could also be divergences in approach, risk-based vs. exhaustive, in effect.

**Q29: what other alternative to approximation would you recommend in cases where collecting information is impracticable?**

A risk-based approach to this.

**Q30: in your opinion, to what extent will the choice of disaggregation level by the undertaking as per ESRS 1 paragraphs 72 to 77 contribute to the reporting of understandable, relevant, verifiable, comparable and faithfully represented sustainability information?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## Time horizon

ESRS 1 paragraph 83 defines short-, medium- and long-term for reporting purposes, as

- One year for short term
- Two to five years for medium term
- More than five years for long-term.

**Q31: do you think it is relevant to define short-, medium- and long-term horizon for sustainability reporting purposes?**

- Yes
- No
- I do not know

Please explain why

**Q32: if yes, do you agree with the proposed time horizons?**

- Yes
- No
- I do not know

Please explain why

**Q33: if you disagree with the proposed time horizons, what other suggestion would you make? And why?**

## **Disclosure principles for implementation of Policies, targets, action and action plans, and resources**

In order to harmonise disclosures prescribed by topical standards, ESRS 1 provides disclosure principles (DP) to specify, from a generic perspective, the key aspects to disclose:

1. when the undertaking is required to describe policies, targets, actions and action plans, and resources in relation to sustainability matters and
2. when the undertaking decides to describe policies, targets, actions and action plans, and resources in relation to entity-specific sustainability matters.

DP 1-1 on policies adopted to manage material sustainability matters describes (paragraphs 96 to 98) the aspects that are to be reported for the relevant policies related to sustainability matters identified as material following the materiality assessment performed by the undertaking.

DP 1-2 on targets, progress and tracking effectiveness defines (paragraphs 99 to 102) how the undertaking is to report measurable outcome-oriented targets set to meet the objectives of policies, progress against these targets and if non-measurable outcome-oriented targets have been set, how effectiveness is monitored.

DP 1-3 on actions, action plans and resources in relation to policies and targets defines (paragraphs 103 to 106) the aspects that are to be reported by the undertaking relating to actions, action plans and resources in relation to policies and targets adopted to address material impacts, risks and opportunities.

**Q34: in your opinion, to what extent will DP 1-1 contribute to the reporting of understandable, relevant, verifiable, comparable and faithfully represented information on sustainability related policies?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q35: in your opinion, to what extent will DP 1-2 contribute to the reporting of understandable, relevant, verifiable, comparable, and faithfully represented information on sustainability-related targets and their monitoring?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

**Q36: in your opinion, to what extent will DP 1-3 contribute to the reporting of understandable, relevant, verifiable, comparable, and faithfully represented information on sustainability-related action plans and allocated resources?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## **Bases for preparation**

Chapter 4 of ESRS 1 provides for principles to be applied when preparing and presenting sustainability information covering general situations and specific circumstances. Aspects covered include:

- general presentation principles (paragraphs 108 and 109);
- presenting comparative information (paragraphs 110 and 111);

- estimating under conditions of uncertainty (paragraphs 112 and 113);
- updating disclosures about events after the end of the reporting period (paragraphs 114 to 116);
- changes in preparing or presenting sustainability information (paragraphs 117 and 118);
- reporting errors in prior periods (paragraphs 119 to 124);
- adverse impacts and financial risks (paragraphs 125 and 126);
- optional disclosures (paragraph 127);
- consolidated reporting and subsidiary exemption (paragraphs 128 and 129);
- stating relationship and compatibility with other sustainability reporting frameworks (paragraph 130).

**Q37: is anything important missing in the aspects covered by the bases for preparation?**

- Yes
- No
- I do not know

## 1C. Overall ESRS Exposure Drafts relevance – Exposure Drafts content

---

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given ESRS Exposure Draft, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the questions asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

### ESRS 1 – General Principles

This [draft] Standard prescribes the mandatory concepts and principles to apply for preparation of sustainability reporting under the Corporate Sustainability Reporting Directive (CSRD) proposal. It covers the applicable general principles:

1. when reporting under European Sustainability Reporting Standards;
2. on how to apply CSRD concepts;
3. when disclosing policies, targets, actions and action plans, and resources;
4. when preparing and presenting sustainability information;
5. on how sustainability reporting is linked to other parts of corporate reporting; and

- specifying the structure of the sustainability statements building upon the disclosure requirements of all ESRS.

Most questions relevant for ESRS 1 are covered in the previous sections of the survey (section 1 Overall ESRS Exposure Drafts relevance – architecture and section 2 Overall ESRS Exposure Drafts relevance – implementation of CSRD principles).

**Q38: in your opinion, to what extent can ESRS 1 – *General principles* foster alignment with international sustainability reporting standards (in particular IFRS Sustainability Reporting S1 Exposure draft)?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

Please explain your reservations or your suggestions for improvement or any other comment you might have

## ESRS 2 – General, strategy, governance and materiality assessment

This [draft] standard sets out the disclosure requirements of the undertaking’s sustainability report that are of a cross-cutting nature. Those disclosures can be grouped into those that are:

- of a general nature;
- on the strategy and business model of the undertaking;
- on its governance in relation to sustainability; and
- on its materiality assessment of sustainability impacts, risks and opportunities.

**Q39: Please, rate to what extent do you think ESRS 2 – General, strategy, governance and materiality assessment**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion
A. Covers sustainability information required by articles 19a and 19b of the CSRD proposal (see Appendix II for CSRD detailed requirements)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

**For part H, please explain why costs would be unreasonable and / or what particular benefit ESRS 2 offers**

**For part I, please specify what European law or initiative you think is insufficiently considered**

**For part J, please explain how you think further alignment could be reached**

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## ESRS E1 – Climate change

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of sustainability reporting to understand:

1. how the undertaking affects climate change, in terms of positive and negative material actual or potential adverse impact;
2. its past, current, and future mitigation efforts in line with the Paris Agreement (or an updated international agreement on climate change) and limiting global warming to 1.5°C;

3. the plans and capacity of the undertaking to adapt its business model(s) and operations in line with the transition to a sustainable economy and to contribute to limiting global warming to 1.5°C;
4. any other actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
5. the nature, type and extent of the undertaking’s material risks and opportunities related to the undertaking’s impacts and dependencies on climate change, and how the undertaking manages them; and
6. the effects of risks and opportunities, related to the undertaking’s impacts and dependencies on climate change, on the undertaking’s development, performance and position over the short-, medium- and long- term and therefore on its ability to create enterprise value .

This [draft] standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify which information to disclose about climate change mitigation and climate change adaptation.

This [draft] standard covers Disclosure Requirements related to ‘Climate change mitigation’, ‘Climate change adaptation’ and ‘Energy’.

**Q40: Please, rate to what extent do you think ESRS E1 – Climate change**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion
A. Covers sustainability information required by articles 19a and 19b of the CSRD proposal (see Appendix II for CSRD detailed requirements)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
B. Supports the production of relevant information about the sustainability matter covered	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
C. Fosters comparability across sectors	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
D. Covers information necessary for a faithful representation from an impact perspective	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
E. Covers information necessary for a faithful representation from a financial perspective	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
F. Prescribes information that can be verified / assured	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
G. Meets the other objectives of the CSRD in term of quality of information	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

I. Is sufficiently consistent with relevant EU policies and other EU legislation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

J. Is as aligned as possible to international sustainability standards given the CSRD requirements

**For part H, please explain why costs would be unreasonable and / or what particular benefit ESRS E1 offers**

**For part I, please specify what European law or initiative you think is insufficiently considered**

**For part J, please explain how you think further alignment could be reached**

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## ESRS E2 – Pollution

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects pollution of air (both indoor and outdoor), water (including groundwater) and soil, living organisms and food resources (referred to in this [draft] Standard as “pollution”), in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the plans and capacity of the undertaking to adapt its strategy, business model(s) and operations in line with the transition to a sustainable economy concurring with the needs for prevention, control and elimination of pollution across air (both indoor and outdoor), water (including groundwater), soil, living organisms and food resources, thereby creating a toxic-free environment with zero pollution also in support of the EU Action Plan ‘Towards a Zero Pollution for Air, Water and Soil’;
4. the nature, type and extent of the undertaking’s material risks and opportunities related to the undertaking’s impacts and dependencies arising from pollution, as well as from the prevention, control, elimination or reduction of pollution (including from regulations) and how the undertaking manages them; and
5. the effects of risks and opportunities, related to the undertaking’s impacts and dependencies on pollution, on the undertaking’s development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the (Draft) Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose about environmental factors, including information about ‘pollution’.

This standard sets out Disclosure Requirements related to pollution of air (both indoor and outdoor), water (including groundwater), soil, substances of concerns, most harmful substances and enabling activities in support of prevention, control and elimination of pollution.

**Q41: Please, rate to what extent do you think ESRS E2 - Pollution**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion

J. Is as aligned as possible to international sustainability standards given the CSRD requirements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**For part H, please explain why costs would be unreasonable and / or what particular benefit ESRS E2 offers**

**For part I, please specify what European law or initiative you think is insufficiently considered**

**For part J, please explain how you think further alignment could be reached**

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## ESRS E3 – Water and marine resources

The objective of this [draft] standard is to specify disclosure requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects water and marine resources, in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to protect water and marine resources, also with reference to reduction of water withdrawals, water consumption, water use, water discharges in water bodies and in the oceans, habitat degradation and the intensity of pressure on marine resources;
3. to what extent the undertaking is contributing to the European Green Deal’s ambitions for fresh air, clean water, a healthy soil and biodiversity as well as to ensuring the sustainability of the blue economy and fisheries sectors, to the EU water framework directive, to the EU marine strategy framework, to the EU maritime spatial planning directive, the SDGs 6 Clean water and sanitation and 14 Life below water, and respect of global environmental limits (e.g. the biosphere integrity, ocean acidification, freshwater use, and biogeochemical flows planetary boundaries) in line with the vision for 2050 of ‘living well within the ecological limits of our planet’ set out in in the 7th Environmental Action Programme, and in the proposal for a decision of the European Parliament and the Council on the 8th Environmental Action Programme;
4. the plans and capacity of the undertaking to adapt its business model and operations in line with the transition to a sustainable economy as well as with the preservation and restoration of water and marine resources globally;
5. the nature, type and extent of the undertaking’s material risks and opportunities related to the undertaking’s impacts and dependencies on water and marine resources, and how the undertaking manages them; and
6. the effects of risks and opportunities, related to the undertaking’s impacts and dependencies on water and marine resources, on the undertaking’s development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about two sub-subtopics: ‘water’ and ‘marine resources’.

**Q42: Please, rate to what extent do you think ESRS E3 – Water and marine resources**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## **ESRS E4 – Biodiversity and ecosystems**

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of sustainability reporting to understand:

1. how the undertaking affects biodiversity and ecosystems, in terms of positive and negative material actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate, actual or potential adverse impacts and to protect and restore biodiversity and ecosystems;
3. to what extent the undertaking contributes to (i) the European Green Deal’s ambitions for protecting the biodiversity and ecosystems, the EU Biodiversity Strategy for 2030, the SDGs 2 Zero Hunger, 6 Clean water and sanitation, 12 Responsible consumption, 14 Life below water and 15 Life on land, the Post-2020 Global Biodiversity Framework and (ii) the respect of global environmental limits (e.g. the biosphere integrity and land-system change planetary boundaries);

4. and the plans and capacity of the undertaking to adapt its business model and operations in line with the transition to a sustainable economy and with the preservation and restoration of biodiversity and ecosystems globally in general; and in particular in line with the objective of (i) ensuring that by 2050 all of the world's ecosystems and their services are restored to a good ecological condition, resilient, and adequately protected and (ii) contributing to achieving the objectives of the EU Biodiversity Strategy at latest by 2030;
5. the nature, type and extent of the undertaking's material risks and opportunities related to the undertaking's impacts and dependencies on biodiversity and ecosystems, and how the undertaking manages them;
6. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on biodiversity and ecosystems, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

This standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about 'biodiversity and ecosystems'. This standard sets out Disclosure Requirements related to the undertaking's relationship to terrestrial, freshwater and marine habitats, ecosystems and populations of related fauna and flora species, including diversity within species, between species and of ecosystems and their interrelation with many indigenous and local communities.

**Q43: Please, rate to what extent do you think ESRS E4 – Biodiversity and ecosystems**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion

## ESRS E5 – Resource use and circular economy

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. the impact of the undertaking on resource use considering the depletion of non-renewable resources and the regeneration of renewable resources and its past, current and future measures to decouple its growth from extraction of natural resources;
2. the nature, type and extent of risks and opportunities arising from the resource use and the transition to a circular economy including potential negative externalities;
3. the effects of circular economy-related risks and opportunities on the undertaking’s development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value in;
4. the plans and capacity of the undertaking to adapt its business model and operations in line with circular economy principles including the elimination of waste, the circulation of products and materials at their highest value, and the nature’s regeneration.

This [draft] standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify information to disclose about ‘resource use and circular economy’.

**Q44: Please, rate to what extent do you think ESRS E5 – Resource use and circular economy**

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion

G. Meets the other objectives of the CSRD in term of quality of information	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
H. Reaches a reasonable cost / benefit balance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I. Is sufficiently consistent with relevant EU policies and other EU legislation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
J. Is as aligned as possible to international sustainability standards given the CSRD requirements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**For part H, please explain why costs would be unreasonable and / or what particular benefit ESRS E5 offers**

**For part I, please specify what European law or initiative you think is insufficiently considered**

**For part J, please explain how you think further alignment could be reached**

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## **ESRS S1 – Own workforce**

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how they affect the undertaking affects own workforce, in terms of positive and negative material impacts;

2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking's material risks and opportunities related to its impacts and dependencies on own workforce, and how the undertaking manages them and,
4. the effects of risks and opportunities, related to the undertaking's impacts and dependencies on own workforce, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value.

In order to meet the objective, this [draft] Standard also requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on its own workforce in relation to:

1. working conditions (impacts related to e.g. living wage, health and safety, social security, working hours, water and sanitation);
2. access to equal opportunities (impacts related to e.g. discrimination, including on the rights of workers with disabilities or on women workers, as well as impacts related to issues of equality in pay and work-life balance, precarious work);
3. other work-related rights, (impacts related to e.g. trade union rights, freedom of association and collective bargaining, child labour, forced labour, privacy, adequate housing).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

This [draft] Standard covers an undertaking's "own workforce", which is understood to include both workers who are in an employment relationship with the undertaking ("employees") and non-employee workers who are either individuals with contracts with the undertaking to supply labour ('self-employed workers') or workers provided by undertakings primarily engaged in 'employment activities' (NACE Code N78). This [draft] Standard does not cover (i) workers in the upstream or downstream undertaking's value chain for whom neither work nor workplace are controlled by the undertaking; or (ii) workers whose work and/or workplace is controlled by the undertaking but are neither employees, nor individual contractors ("self-employed workers"), nor workers provided by undertakings primarily engaged in "employment activities" (NACE Code N78); these categories of workers are covered in ESRS S2 Workers in the Value Chain.

**Q45: Please, rate to what extent do you think ESRS S1 – *Own workforce***

## **ESRS S2 – Workers in the value chain**

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects workers in its value chain through its own operations and its upstream and downstream value chain (including its products and services, its business relationships and its supply chain), in terms of material positive and negative actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking’s material risks and opportunities related to its impacts and dependencies on workers in the value chain, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to the undertaking’s impacts and dependencies on workers in the value chain, on the undertaking’s development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on value chain workers in relation to impacts on those workers’:

1. working conditions (impacts related to e.g. living wage, health and safety, social security, working hours, water and sanitation);
2. access to equal opportunities (impacts related to e.g. discrimination, including on the rights of workers with disabilities or on women workers, as well as impacts related to issues of equality in pay and work-life balance, precarious work);
3. other work-related rights, (impacts related to e.g. trade union rights, freedom of association and collective bargaining, child labour, forced labour, privacy, adequate housing).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

This [draft] standard covers all workers in the undertaking’s upstream and downstream value chain who are or can be materially impacted. This also includes all non-employee workers whose work and/or workplace is controlled by the undertaking but are not included in the scope of “own workforce” (“own workforce” includes: employees, individual contractors, i.e., self-employed workers, and workers provided by third party undertakings primarily engaged in ‘employment activities’). Own workforce is covered in ESRS S1 Own workforce.

## **ESRS S3 – Affected communities**

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects its local communities through its own operations and its upstream and downstream value chain (including its products and services, its business relationships and its supply chain), in terms of material positive and negative actual or potential adverse impacts;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking’s material risks and opportunities related to the undertaking’s impacts and dependencies on affected communities, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to their impacts and dependencies on local communities, on the undertaking’s development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [Draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on affected communities in relation to:

1. impacts on communities’ economic, social and cultural rights (e.g. adequate housing, adequate food, water and sanitation, land-related and security-related impacts);
2. impacts on communities’ civil and political rights (e.g. freedom of expression, freedom of assembly, impacts on human rights defenders); and

3. impacts on particular rights of Indigenous communities (e.g. free, prior and informed consent, self-determination, cultural rights).

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

## ESRS S4 – Consumers and end-users

The objective of this [draft] standard is to specify Disclosure Requirements which will enable users of the sustainability reporting to understand:

1. how the undertaking affects the consumers and end-users of its products and/or services (referred to in this [draft] Standard as “consumers and end-users”), in terms of material positive and negative actual or potential adverse impacts connected with the undertaking’s own operations and upstream and downstream value chain, including its business relationships and its supply chain;
2. any actions taken, and the result of such actions, to prevent, mitigate or remediate actual or potential adverse impacts;
3. the nature, type and extent of the undertaking’s material risks and opportunities related to its impacts and dependencies on consumers and end-users, and how the undertaking manages them; and
4. the effects of risks and opportunities, related to their impacts and dependencies on consumers and end-users, on the undertaking’s development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value.

In order to meet the objective, the [draft] standard requires an explanation of the general approach the undertaking takes to identify and manage any material actual and potential impacts on the consumers and /or end-users related to their products and/or services in relation to:

1. information-related impacts for consumers/end-users, in particular privacy, freedom of expression and access to information; .
2. personal safety of consumers/end-users, in particular health & safety, security of a person and protection of children; and
3. social inclusion of consumers/end-users, in particular non-discrimination and access to products and services.

This draft standard derives from the [Draft] Corporate Sustainability Reporting Directive stating that the sustainability reporting standards shall specify the information that undertakings are to disclose regarding social factors.

## **ESRS G1 – Governance, risk management and internal control**

The objective of this [draft] standard is to specify disclosure requirements which will enable users of the undertaking’s sustainability report to understand the governance structure of the undertaking, and its internal control and risk management systems.

This [draft] standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose information about governance factors, including:

1. the role of the undertaking's administrative, management and supervisory bodies, including with regard to sustainability matters, and their composition, as well as a description of the diversity policy applied and its implementation;
2. the undertaking's internal control and risk management systems, including in relation to the undertaking's reporting process.

**Q49: Please, rate to what extent do you think ESRS G1 – Governance, risk management and internal control**

Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment

part I - Corporate Sustainability Due Diligence

## ESRS G2 – Business conduct

The objective of this [draft] standard is to specify disclosure requirements for the undertaking to provide information about its strategy and approach, processes and procedures as well as its performance in respect of business conduct.

This [draft] standard derives from the [Draft Corporate Sustainability Reporting Directive] stating that the sustainability reporting standards shall specify information to disclose about business ethics and corporate culture, including anti-corruption and anti-bribery.

In general, business conduct covers a wide range of behaviours that support transparent and sustainable business practices to the benefit of all stakeholders. This [draft] standard focusses on a limited number of practices as follows:

1. business conduct culture;
2. avoiding corruption, bribery and other behaviours that often have been criminalised as they benefit some in positions of power with a detrimental impact on society; and
3. transparency about anti-competitive behaviour and political engagement or lobbying.

This [draft] standard is addressing business conduct as a key element of the undertaking’s contribution to sustainable development. This [draft] standard requires the undertaking to report information about its overall policies and practices for business conduct, rather than information for specific material sustainability topics.

### Q50: Please, rate to what extent do you think ESRS G2 – Business conduct

	Not at all	To a limited extent with strong reservations	To a large extent with some reservations	Fully	No opinion
A. Covers sustainability information required by articles 19a and 19b of the CSRD proposal (see Appendix II for CSRD detailed requirements)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

I. Is sufficiently consistent with relevant EU policies and other EU legislation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
J. Is as aligned as possible to international sustainability standards given the CSRD requirements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**For part H, please explain why costs would be unreasonable and / or what particular benefit ESRS G2 offers**

**For part I, please specify what European law or initiative you think is insufficiently considered**

**For part J, please explain how you think further alignment could be reached**

**Please share any comments and suggestions for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment**

## 2. ESRS implementation prioritisation / phasing-in

---

### Application provisions

In order to facilitate the first-time application of set 1, ESRS 1 includes two provisions:

- Application Provision AP1 which exempts undertaking to reports comparatives for the first reporting period, and
- Application Provision AP2 which proposes transitional measures for entity-specific disclosures which consists in allowing the undertaking to continue to use, for 2 years, disclosures it has consistently used in the past, providing certain conditions are met, as described in paragraph 154.

**Q51: to what extent do you support the implementation of Application Provision AP1?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully

No opinion

**Q52: to what extent do you support the implementation of Application Provision AP2?**

- Not at all
- To a limited extent with strong reservations
- To a large extent with some reservations
- Fully
- No opinion

**Q53: what other application provision facilitating first-time application would you suggest being considered?**

In order to grant companies more flexibility, FERMA would support a gradual implementation of the reporting requirements.

For instance, it may be worthwhile allowing first-time reporting companies the option of a simplified report.

Another suggestion would be for EFRAG to highlight a selection of mandatory reporting lines, i.e. one mandatory metric per-section.

**Please explain why**

The timeline is challenging but remains doable, especially for companies in scope of NFRD. However, FERMA members did stress the point that there are a wide variety of different reporting requirements either in-place (e.g. Taxonomy) or anticipated soon (e.g. these EU SRS, or even those stemming from Corporate Sustainability Due Diligence).

In real terms, FERMA members remarked that since they will in essence be reporting to EU SRS from 1 January 2024, they will need to already begin the process of collecting the data – or at least setting up the collection of data – in October of 2022, in order to be sure that over the course of 2023 they are able to manage data collection.

## **ESRS implementation prioritisation / phasing-in options**

Set 1 proposes a comprehensive set of standards aimed at achieving the objectives of the CSRD proposal, with the exception of the standards to be included in Set 2.

Acknowledging the fact that the proposed vision of a comprehensive sustainability reporting might be challenging to implement in year one for the new preparers and potentially to some of the large preparers as well, EFRAG will consider using some prioritisation / phasing-in levers to smoothen out the implementation of the first set of standards.

The following questions aim at informing EFRAG's and ultimately the European Commission's decision as to what disclosure requirements should be considered for phasing-in, based on implementation feasibility / challenges and potentially other criteria, and over what period of time their implementation should be phased-in.

**Q54: for which one of the current ESRS disclosure requirements (see Appendix I) do you think implementation feasibility will prove challenging? and why?**

All of them will. The timeline is ambitious. And, there are other reporting requirements in place, which already take up a lot of resource (eg EU Taxonomy).

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

**Q55: over what period of time would you think the implementation of such “challenging” disclosure requirements should be phased-in? and why?**

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

**Q56: beyond feasibility of implementation, what other criteria for implementation prioritisation / phasing-in would recommend being considered? And why?**

Given the critical importance of implementation prioritisation / phasing-in, please justify and illustrate your response

**Q57: please share any other comments you might have regarding ESRS implementation prioritisation / phasing-in**

---

If you have other comments in the form of a document please upload it here
